I purchased Disoriented on sale. I'm a fan of puzzle games and this one seemed to be right up my alley. For the sale price, I figured it would be tough to be disappointed, and pleasantly I am not at all. Gameplay is straight forward with a gradual learning curve. Puzzles are not exceptionally difficult, but are sufficiently rewarding. As some other reviewers have noted, it may benefit from deeper elements, something approaching a story, purpose, or meaning. Additional puzzles beyond those included would also be a strong selling point if included. As is though, I found the game's soundtrack to be peaceful and calming, especially in those moments when I truly was disoriented and in need of unperturbed thought. For the price, it was a nice distraction and I would recommend it for anyone who is a fan of the genre.. Game is simply boring. Nothing new here and the controls are terrible! I've had a lot of trouble just finishing the tutorial. The Worms theme is nice but that's it. Not worth the asking price of 9\$ CDN. Worth 1 or 2 dollars, not more.

You can configure a gamepad with this game but the graphic options are limited to 1024x768 in stretched mode at best.

I haven't tried the two player mode yet but I doubt we'll have much fun with it.. Get a controller. While this game can be played with mouse & keyboard, it is beyond frustrating (and not in a good way) to do so. This game needs to be played with a controller to get the most out of it.

Overall, this is a great game with solid aesthetics and game play and I highly recommend getting it if you happen to have a controller.. I really really love this game! Good music, pretty backgrounds, and easy controls. It's something you can play for 10-15 minutes and de-stress. Super great, and I can't wait to see more backgrounds and music come out. What I noticed at the beginning was that the interface was blurry for me, but I went into options and cranked the resolution to the max and now it looks nice and crisp. I had trouble knowing what was good and what was going to kill me, but figured it out after a few failures. It would be nice if the bad stuff was a little more obvious, and the powerups were explained too. I still don't know what all the powerups do, but will learn with experience. I'd recommend this game. It's super. It's easy. It's fun.. This game has a very interesting concept , a fine work of only 2 people who made this game some elements in the game have a very different style of horror taste in it which is refreshing theres maybe only 1 part that maybe you do need to youtube the answer { least thats what i did } it was a good experince i really look foward for the next update to continue the story!

May10th 2019 , Full Version of the game is out , yeah they reworked a few things , only downside is this game is really short i was hoping for more things to do but it was slightly extended then the version i played back 4 months ago

do i recommend it? yeah if you want to play a unique style of horror game go for it its pretty good but really short. Great art style. And the music fits very well, too. I guess turning the volume of the sounds down a little wouldn't hurt though.

I love this game the visual and audio is stunning and the plot is craving but there is one thing wrong. I can't buy the soundtrack.\ud83d\udd0a. Bought Wanderlust: Rebirth

We rekt everything

10/10 can rekt things with friends. This game looks promising!

Like the other reviews, I'm impressed by what's been accomplished here by a two man team. It's a fun little arena style game, but in it's current form is probably no more than a quick distraction than something I could play for hours. However, that doesn't mean that I couldn't play this for hours once it's had some of the rough edges rounded out!. Extremely fun with friends to goof off and have a good time. This game is a piece of horse♥♥♥♥♥and if you play it the game will burn your eyes. ITS SOO BAD

### . #18 Building Pineview:

Hello!

Over the past couple of weeks, I've managed to finish up the remaining dialogues and scenes, and the core of the game is now essentially complete! As promised in the last devlog, I've since begun work on adding new areas to the town named Pineview.

Here's a glimpse of one of those new areas: Aspen Street!

These areas will also be populated with NPCs to talk to, and will have observable objects that add to the lore, history and myths of Pineview.

Another couple of days and the new areas will be finished, after which I'll begin connecting them to the rest of the game. After that, I'll work on adding the diary/ journal mechanic and improving the UI!

See you next time!
